
The Theodora Oringher Healthcare Practice Group provides complete transactional and litigation services to our healthcare industry clients. With decades of experience in the healthcare industry, Theodora Oringher has one of the most comprehensive healthcare practices of any law firm in California with more than two dozen attorneys with extensive knowledge in the full breadth of healthcare matters: regulatory, business transactions and litigation.

Theodora Oringher healthcare litigators are well known for their successes and trial victories in all types of healthcare disputes. We regularly handle complex matters involving: clinical issues; staff discipline; billing and payor disputes; general commercial/contract disputes; government/regulatory disputes; shareholder/owner disputes; intellectual property disputes; employment disputes; and class actions.

We serve as outside general counsel providing a full range of healthcare law services to many managed care plans, hospitals, physician groups, management companies, and integrated delivery systems, some of whom may have either a small in-house legal staff or none at all. We also regularly serve as special counsel on individual issues or transactions, and work with a client's existing in-house or outside legal counsel.

Our experience, diversity and comprehensive understanding of the healthcare delivery system make us unique in our ability to effectively service clients in this complex industry and successfully meet the challenges posed by a constantly changing regulatory landscape.

Because the scope of a client's needs can extend simultaneously into many areas of law, our attorneys often work as teams to share their diverse experience and knowledge, providing our healthcare clients with comprehensive, efficient, and pro-active legal advice and business consultation in a variety of areas:

Business strategy

Financing — including securities advice for public companies or for private companies considering an IPO

Business formations — including mergers and acquisitions, affiliations, dispositions and restructurings; joint ventures

Licensing and certification

Fraud and abuse, anti-kickback, anti-referral and other regulatory and compliance matters

Legislative and regulatory advocacy

Real estate

Contracting

Corporate governance

Employment matters.
